

Calf-Strong is a new type of functional nutrition supplement (ORS) specially used for young ruminants (lactating calves, lambs), which can significantly reduce calves, lambs, etc. due to various pathogenic bacteria or stress (such as weather changes, Symptoms of diarrhea caused by vaccination, transportation and feed changes, etc., and reduce the adverse effects of metabolic acidosis caused by diarrhea, can quickly replenish energy and electrolytes to prevent dehydration.

Calf-Strong

Nutrient salt Calf-Strong to prevent the neonatal calf diarrhea and anti-stress

INGREDIENTS

NaCl, KCl, NaHCO_3 , CH_3COONa , sodium citrate etc.

TECHNICAL INDEX

Technical index	Na	K	Cl	glycine	MOS	$[\text{HCO}_3]^-$	citrate	$[\text{CH}_3\text{COO}]^-$
content/%	≥ 3	≥ 1	≥ 3	≥ 1	≥ 0.5	≥ 2	≥ 2	≥ 1

INDICATION

- ✓ Replenish electrolyte to prevent calf dehydration and relieve acidosis.
- ✓ Replenish energy and reduce stress quickly.
- ✓ Regulate gastrointestinal ecological environment and enhance immunity.

DIRECTION FOR USE

Neonatal calf: Mix 100g into 3 liters warm water, milk or milk substitute powder, feeding immediately after mix, every 8 to 10 hours for 2 consecutive days.

For calves that are larger or require more energy: Mix 150g into 3 liters warm water, milk or milk substitute powder, feeding immediately after mix, every 8 to 10 hours for 2 consecutive days.

PACKING SIZE

100g/bag, 60bags/carton
