

IronQ₁₅₀

Iron dextran injection

ACTIVE INGREDIENTS

Each mL contains Iron (as Iron Dextran) 150mg

INDICATIONS

Antianemic drugs. For the prevention and treatment of iron deficiency anemia in foal, calf, piglet, puppy and furry animals.

DOSAGE AND ADMINISTRATION

Intramuscular injection: A single dose, foal and calf, 1.33-4mL; piglet, 0.67-1.33mL; puppy, 0.13-1.33mL; fox, 0.33-1.33mL; mink, 0.2-0.67mL.

CAUTIONS

- *The dose of intramuscular injection should be strictly controlled.
- *Intramuscular injection can cause local pain, deep intramuscular injection should be performed.
- *Staining of the ham muscle may be caused after injected intramuscularly into piglets beyond 4 weeks of age.
- *Protect from freezing, and precipitation may be formed during long-term storage.
- *Iron salts can react with many chemicals or drugs, so they should not be administered in combination with other drugs.

STORAGE

Protect from light.
