

Qirelin

Gonadorelin Injection

INDICATIONS:

Cattle: Induction and synchronization of oestrus and ovulation in combination with prostaglandin F2 α (PGF2 α) or analogue.

DOSAGE & ADMINISTRATION

Intramuscular use.

100 μ g of gonadorelin (as diacetate) per animal in a single injection. i.e. 2mL of the product per animal.

Induction and synchronization of oestrus and ovulation in combination with a prostaglandin F2 α (PGF2 α) or analogue:

Day 0: First injection of gonadorelin (2mL of the product). Day 7: Injection of prostaglandin (PGF2 α) or analogue. Day 9: Second injection of gonadorelin (2mL of the product) should be done. The animal should be inseminated within 16-20 hours after the last injection of the product or at observed oestrus if sooner.
